

**3934** - Electromagnetic Hold-open or Swing-free (Level 5)

Typically used on fire rated doors where the hold-open or swing-free feature is required either in high traffic areas for convenience or in situations where it would be difficult to satisfy the maximum opening force requirements of Part M of The Building Regulations.

Each unit can be set to either 'hold-open' or 'swing-free' operation. In either case the spring closing function of the closer can be temporarily disabled to allow free passage. When de-activated via a connection to the building fire alarm or smoke detection system, the electromagnet disengages and the door closer closes the door in the normal manner to maintain fire safety.

Smart, reliable and fire safe

**Features & Benefits**

- Template adjustable power Size EN 3-4 (see table)
- Stainless steel grade 304 softline cover available in silver and satin steel finishes to suite with Briton 2300 and 2700 closers with softline covers to complement a variety of door hardware ranges.
- Designed for use on low voltage circuits 24V DC linked to a fire alarm
- Solution offering hold-open and free swing
- Easy Installation
- Attractive compact design
- Test switch simulates fire condition of check operation
- When the fire alarm is activated, the door will close automatically from any position to help prevent the spread of fire

Mounting	Power size	Max. door opening	EN Classification
Door mounted	3	180°	3 8 3-4 1 1 3
	4	110°	
Transom mounted	3	180°	3 8 3-4 1 1 3
	4	110°	
Parallel mounted	3	170°	3 8 3 1 1 3
